Mr. Lewis:

Your Plan of Operations (Plan) to conduct mining activities in the Desert Mountain area of Juab County, Utah was received in the Fillmore Field Office on March 12, 2013. Your proposed Plan is located in the SE $\frac{1}{4}$ of the SE $\frac{1}{4}$ of section 35, Township 12 South, Range 7 West, Salt Lake Meridian. The proposed Plan has been assigned Bureau of Land Management (BLM) case file number UTU-89546. Please refer to this number in future correspondence concerning this proposed operation.

A letter was sent to you on April 15, 2013, in which you were notified that additional information was required for your proposed Plan to be complete. To date, we have not received a response. Please provide responses to the items specified in the letter within 30 days. If we do not receive a response to the information request within 30 days, the proposed Plan will be rejected as incomplete and the BLM case file will be closed.

Please provide responses to the April 15th information requests at your earliest convenience. You may provide replacement pages or a narrative response. Upon receipt of the required information, the BLM will determine whether or not the Plan is complete.

Once the Plan is determined complete, the BLM will solicit public comment on the Plan under 43 CFR § 3809.411(c), either separate from, or as a part of, the environmental review process required by the National Environmental Policy Act (NEPA). Solicitation of public comment must occur before a decision is made on the Plan according to 43 CFR § 3809.411(d).

In order to prepare the environmental review document and process your Plan, the BLM requires that the intended disturbance area be inventoried for cultural resources. As required by 43 CFR § 3809.401(c), the operator is responsible for providing this survey information. Please provide the required cultural resource inventory as soon as it is finished. If you require further information on inventory methods and qualifications, please contact the Fillmore Field Office Archeologist, Russel Tanner at (435) 743-3165.

The BLM requests that you submit a reclamation cost estimate that covers the equipment type, and rate needed to perform reclamation tasks such as mobilization, grading, topsoil placement, seeding, and structural removal for each component of the mining project. The cost estimate must estimate the costs assuming the BLM were to hire a third party contractor and must include costs for contract administration and overhead costs. The cost estimate must also include appropriate costs for contractor profit and insurance.

If you have any questions on these information requests, please contact Duane Bays, Fillmore Field Office Natural Resource Specialist, at (435) 743-3115.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael D. Gates", followed by a stylized flourish or second signature.

Michael D. Gates
Field Manager
